

SMFUTIL

Advantages of using SMFUTIL to Automate SMF Dumping Procedures

- "Normal" Output Dataset(s) can be used by any SMF DATA Analysis Program
- "Intelligent" IEFU29 Exit provided
- Duplex is Automatic with one pass of Data
- "MOD" output files with no danger of data duplication
- Split output into Dataset based on Day/Week/Month Boundary (User month calendar supported)
- Verifies correct MANx dumping sequence
- Verifies process is not repeated
- Verifies clear is completed
- Return codes can be used to kick off periodic processes
- Dynamic allocation supported for Tape and Disk
- Automatic Generation of DSNAME suffixes
- User special purpose subset creation at dump time with full split boundary support
- "Archiving" of location of output data for later recall
- Snap out invalid records to print
- Fewer tape mounts and complete utilization of each volume
- Automatic DCB specification with block size optimised for device type
